about

I have spent my adult life marrying my passion for helping people with a deep understanding of technology. I have taught children with Autism to compose electronic music, I have helped medical students adapt to new learning environments and I have played a part in transforming the Sally Beauty E-Commerce platform into an accessible, intuitive experience.

portfolio

blood lines is a 3D family tree visualizer built with React & D3

soil is a travel map, made with ES6 & Google Maps API

skills

JavaScript | React | Node | NPM | Webpack | Git | HTML | CSS | Sass | Salesforce | Photoshop | XD | Figma

education

B.M., Music Therapy
Arizona State University

experience

Sally Beauty Holdings

2020 - present
Denton, TX

Manager, Front End Development (2022)

Developed and implemented a streamlined workflow & QA process, giving the dev team greater agility in responding to changing business needs.

Sr. Front End Developer

Innovated automations to improve site performance and reduce build time.

Worked with partners to implement experiments, which reduced bounce rate and increased conversion and RPV.

ohKayBlanket

2018 - present
Dallas, TX

Front End Developer

Developed and launched an international multi-lingual ecommerce platform.

Produced business sites for clients with a focus on mobile first, SEO, accessibility and clean UI design.

St. George's University of London

2015 - 2017
London, U.K.

IT Support Analyst

Worked with SQL and Dev team in database debugging.

Wrote Visual Basic for Applications (VBA) code to improve auditing workflow & documentation.

Gateway Academy

2006 - 2014
Scottsdale, AZ

Director of Music

Improved student computer literacy through creating and leading a digital music program.
